Office Hours: Periods #6 and #7, Tutorial (when in person), By Appointment (Room 503 when in person), office hours

This class is a required course for graduation from Lynbrook High School

Class Synopsis:

This Economics class is a study of the major systems and influences that guide our economy – it is a survey course of the subject that covers the biggest elements of both Micro and Macro Economics. There is an emphasis on business principles and behavioral economics.

Textbooks: *Economics: Principles & Practices*

Economics Units:

- What is Economics?
- Economic Structures – System and Business Types + Investment
- Microeconomics - Supply & Demand
- Microeconomics – Equilibrium & Prices
- Money, Wages, & Labor
- Market Structures
- Economic Policies

Classroom Rules (in person):

- Be Respectful. This covers your interactions with others in the class, your language, property, personal conduct, and cleaning up after yourself.
- Ask Permission. Before leaving to use the restroom, using your electronic devices (cell phones not allowed), or leaving class for any reason – please check with me first.
- Don't Cheat*. Enough said.

Classroom Rules (online):

- Be Respectful. This covers your interactions with others in the class, your language, property, personal conduct, and general online content
- Ask Permission. Online is very different than in person... while in small group discussions or activities, please try to stay attentive and active. If you need to use the bathroom or something of that nature, please make it quick and try to avoid poor times to be away as best as possible.
- Don't Cheat*. Enough said.

* For this class, students will be expected to abide by the FUHSD Academic Honesty Policy. A copy of the policy is available in the student planner or on the LHS website. Examples of academic dishonesty include, but are not limited to, using unauthorized materials for assessments, copying material or answers from other students, plagiarism, and submitting work created/completed by others.

Additionally, please note that you are held to the standards of the FUSHD technology usage standards – familiarize yourself with these so you keep yourself within proper regulations.

Policies:

Homework/Projects:

The vast majority of work will come in at four predetermined times in the semester. Your work will be presented in a binder in an organized fashion (as instructed by me) when in person. Online, work will be collected by digital submission. Late work is generally accepted for partial credit but you should check prior. The assignment is late if you don't have the completed assignment at the start of your period on the day the assignment is due. Printer and tech problems need to be solved by finishing work early to allow for alternative solutions like printing at a friend's house, printing at school, sending in documents via another method, communicating with MistaBale about a solution, or going to Kinkos. Handle your business – do not ask to go to the library to print out something at the start of class when in person.

Returning from Absences:

It will be your job as a student to come to me requesting your makeup work when returning from excused absences. Assignments due while absent will be expected the first day back (see above) unless the assignment was assigned during an absence. Communication is vital and I expect that you come talk with me at the earliest time possible so you can get caught up on work missed.

Test/Project Make-up:

There will be several large projects (as well as tests) that require your daily attendance in class. Missing these will set you back considerably. I reserve the right to give you additional assignments that can be completed individually if you miss too much time on a group project. Tests will be given on a date arranged by you and me, but you should be prepared to take a test as soon as you return to class.

Lectures:

Most lectures are available online in an abbreviated format for your use in studying or if you are absent. Some lectures will be watched at home (found on my website – mistabale.com) in lieu of watching them in class, but you'll always be notified well in advance of these so you can be prepared for class. Students are still expected to be engaged during lectures in class.

Participation:

I look kindly on attitude and work ethic. Students who slack off and rarely contribute can expect a grade that matches their performance. Participation is gauged both by quality and quantity. Part of coming to class means being a contributor to our communal learning environment for the full-length of class.

Being Prepared:

Students should always come to class with their Economics binder, writing tools, paper, and additional materials/books when specifically specified in advance. Students should also check Schoology and/or Mistabale.com daily to make sure they are kept up to date on assignments and due dates. I do email the class through Schoology and sometimes Infinite Campus. Students can count on the fact that I will not make late-night changes to assignments and expect them to be viewed for the next day.

Cell Phones:

Due to security concerns as well as their extreme distraction potential, cell phones will not be allowed in class at any time unless specifically noted for class usage. Phones should remain stored as directed and be turned off or set to a non-audible ring tone. You can hit up your partners later.

Grading:

All grades are *automatically rounded* within my grading program to the nearest whole number and all grades fall into these pre-set weighted categories. Grade updates will be issued online at my discretion.

Participation – 15%	90-100% - A
Exams - 40%	80-89% - B
(5-6 Exams)	70-79% - C
Quizzes – 10%	60-69% - D
(~10 Quizzes)	59% or lower – F
Classwork/Homework – 35%	

Note Regarding Tests/Quizzes:
Tests are available for student viewing, but will not be permanently returned. They remain on file for the duration of the semester. Some quizzes may be withheld from being returned but will be available for viewing as well.
